Jesse Erwin

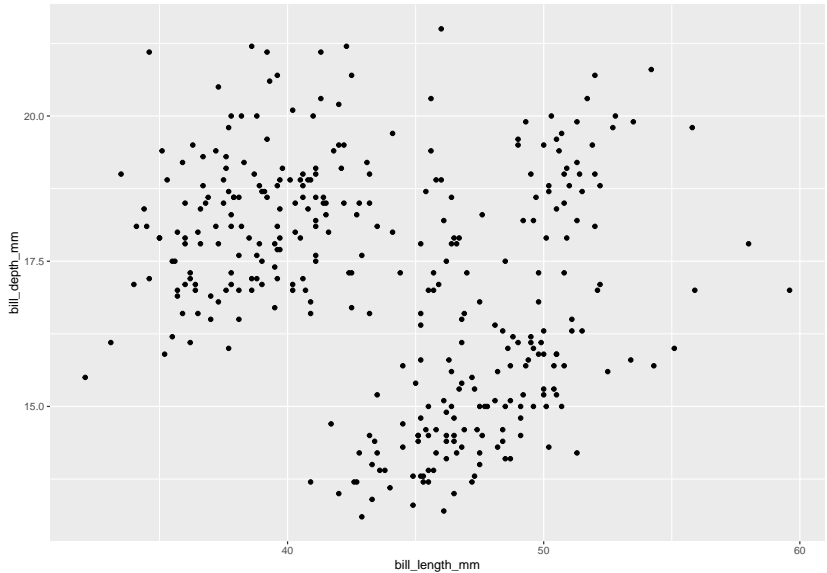

# R Markdown

This is an R Markdown presentation of different visualization using ggplot2.

# Scatter plot showing larger penguins have longer flippers

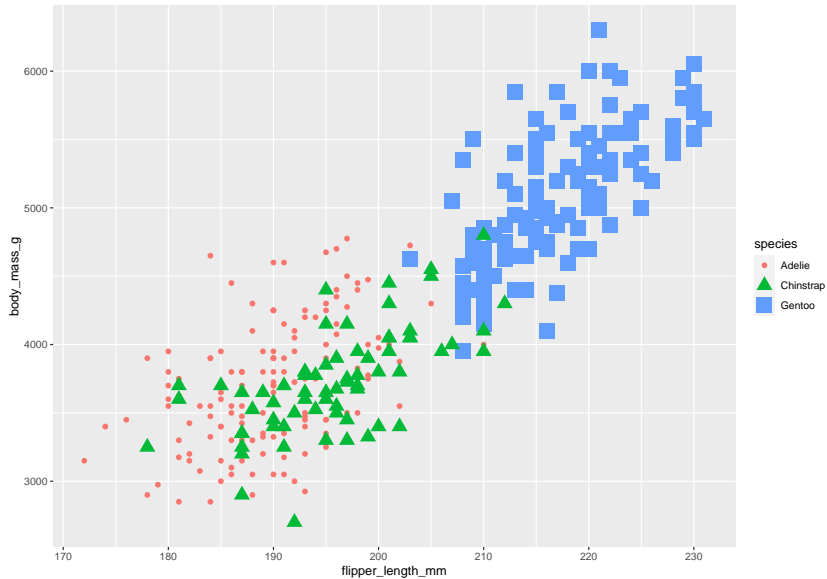

Scatter plot showing bill length verse bill depth

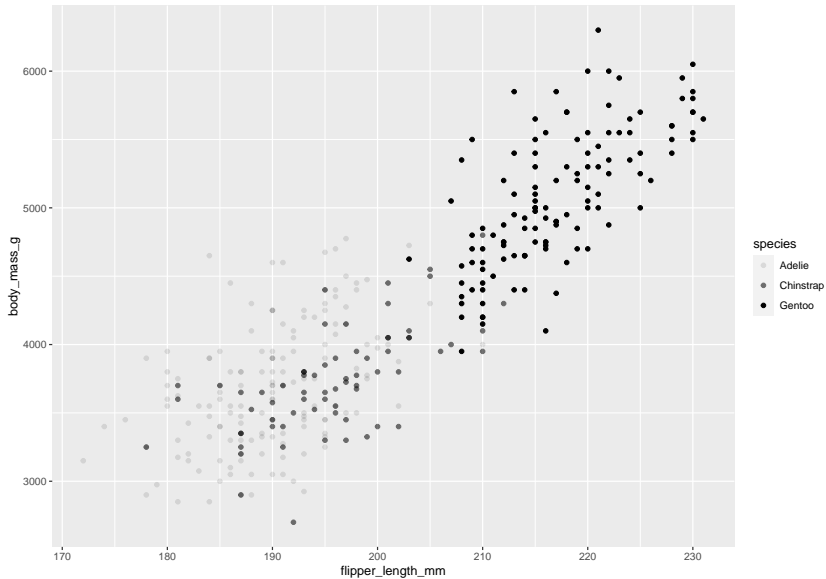

# Scatter plot mapping species by color

# Scatter plot mapping species by color and shape

# Using alpha to map points as transparent

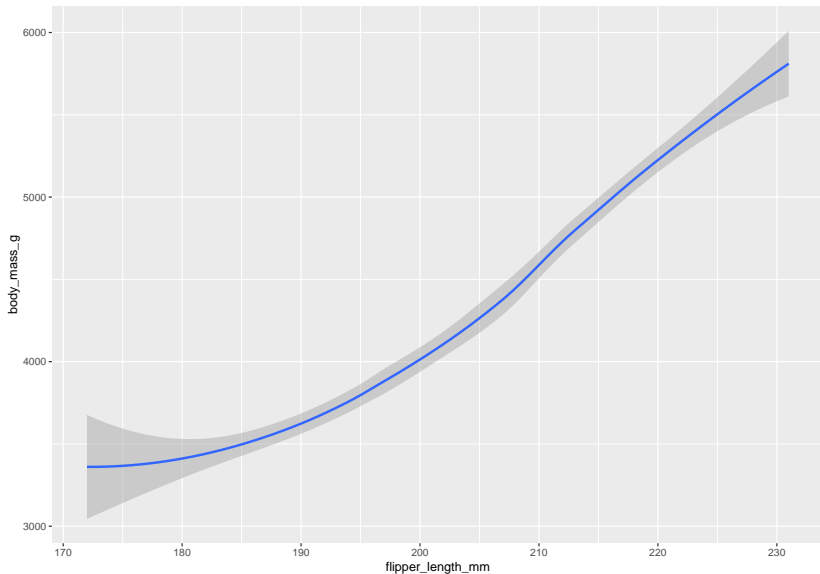

## Setting the aesthetic apart from a specific variable

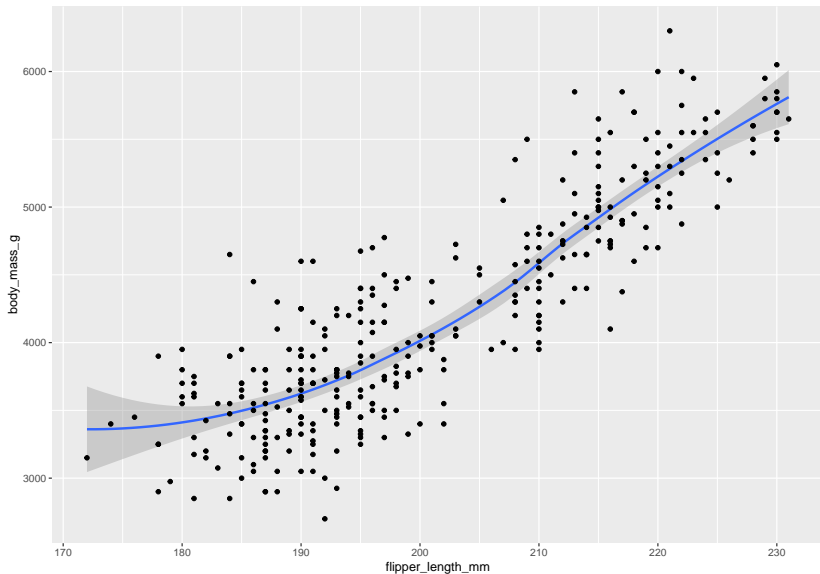

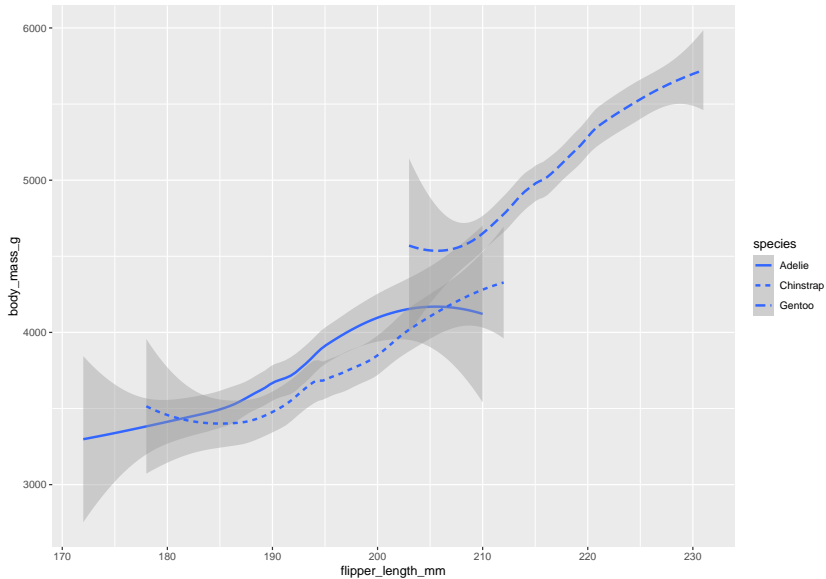

## Plotting a smooth line verse a scatter points

## Showing scatter ontop of smooth lines

## Different linetype for each species

## Displaying a colored bar chart
